Affordable Innovations for Your Practice

Major Themes:

1. 8th generation adhesion
2. Only one restorative shade is needed for esthetics
3. Robotic implant surgery
4. Advanced rapid multi-tasked polymerization
5. Post-COVID dentistry
6. Simplified oral health maintenance
7. Milling or printing? Rationale and costs
8. And much more.....

A focused review of recently introduced dental materials and technologies, and their impact on your dental practice. The questions the dentist must ask:

- Do I need it?
- Can I afford it?
- Can I delegate it?

Dr. George Freedman DDS, DipIABAD, FAACD, FIADFE
Adjunct Professor of Dental Medicine, Western
University, Pomona, California

Dr. George Freedman is a founder and past president, American Academy of Cosmetic Dentistry, a co-founder, Canadian Academy for Esthetic Dentistry, Regent and Fellow, International Academy for Dental Facial Esthetics, and a Diplomate and Chair of the American Board of Aesthetic Dentistry. He is Adjunct Professor of Dental Medicine, Western University, Pomona, California and Professor and Program Director, BPP University, London, UK, MCLinDent Programme in Restorative and Cosmetic Dentistry. His most recent textbook is "Contemporary Esthetic Dentistry" (Elsevier). He is author of 14 textbooks, > 900 dental articles, and numerous webinars. Dr

Freedman received the NYU College of Dentistry Prize in Aesthetic Dentistry and is International Editor-in-Chief of Dental Tribune and 3D Dentistry, and on the editorial Boards of Dentistry Today, Oral Health and Dental Asia . An internationally renowned lecturer (esthetic restoratives, adhesion, implants, veneers, 3D printing, and dental technologies), he maintains a private practice limited to Esthetic Dentistry in Toronto, Canada.
